December 26, 2021 - Coub is YouTube for video loops. You can take any video, trim the best part, merge with other videos, add soundtrack. The cycles you create can be saved and shared with other users. We offer ready-made templates for creating your own cycles. When creating a new cycle, you specify the duration of its video. Thus, the duration of the video for the whole cycle must be a multiple of the duration of the part. For example, the length of the video "Happy New Year!" is 1 minute. Then for the whole cycle, the duration of the video should be a multiple of the duration of the part: 1: 1 minute. fffad4f19a
