Data and Statistical Analysis 3 Author(s): Bhattacharya, Amitabha; Advani, Vivek Abstract: In this paper, the authors have analyzed the data and trends of digital communication, particularly through various communication media and for various purposes in the country. The paper is a result of a study done for a university degree course on 'data and communication' (DC) at the Indian Institute of Information Technology and Management, Gwalior. The paper is an initial effort to analyze the data and trends of digital communication, and how they have been used in the various fields of data. The data have been collected from various sources. 2. The Concept and Data Processing of Digital Communication 4 Abstract: Digital communication has made a deep impact on our lives. This has not just increased our efficiency and better performance, but also provided a better way of sharing knowledge, particularly in the area of e-commerce. We have seen a significant increase in the number of users of various communication channels. Electronic communication has been adopted by companies and organizations for a number of reasons. Increasing e-mail traffic has forced organizations to rethink their communication strategies. A recent survey conducted by the Association of Internet Professionals (AIP) revealed that online marketers' use of email more than doubled from 2002 to 2003. This paper attempts to answer the following questions: What are the various communication channels being used today by individuals and organizations? What are the new trends in e-commerce? What has been the impact of these trends on the social, personal and professional life? How has digital communication been adopted in the e-commerce sector? In short, what does digital communication mean for us in this day and age? 3. The Status of Digital Communication in India 6 Abstract: Digital communication is still an area that needs to be explored. To understand the magnitude of digital communication, it is important to understand the historical background and the broad base of development of digital communication in India. In this paper, the authors will briefly describe the evolution of
