In July 2013, AutoCAD released the first version of AutoCAD LT (formerly AutoCAD R12), which runs on low-end microcomputers, and is intended to enable entry-level use of the AutoCAD products by CAD operators not accustomed to high-end technology. AutoCAD LT is designed to work on older PCs that are slower than the newer PCs that come with AutoCAD.

There are three editions of AutoCAD LT: Basic, Premium, and Professional. AutoCAD LT is a member of the Autodesk Solutions family. Most of the features of AutoCAD are included in AutoCAD LT, and a key difference is that in AutoCAD, the user works at a desktop and logs in to the application using a username and password. In AutoCAD LT, the user has an online workspace where they can view and edit drawings. For this reason, the name AutoCAD LT is often used when referring to the product. AutoCAD is licensed in two editions: AutoCAD LT and AutoCAD LT/3D (for the year 2017). The three-dimensional drawing capability is provided by the free AutoCAD LT/3D Premium. AutoCAD LT/3D is an option for the year 2017; from

2018, it will be bundled with the full version of AutoCAD LT. For AutoCAD LT/3D, the software can read DWG, DWF, DGN, DGN files, DXF and DAE files. To assess the diagnostic value of T1-weighted three-dimensional (3D) gadolinium-enhanced spoiled gradient recalled echo (GRE) with sub-millimeter in-plane resolution in cervical spine. In this prospective study, 100 consecutive patients with clinically suspected

cervical spine disorders were included. All patients underwent routine magnetic resonance imaging (MRI) and 3D T1-weighted gadolinium-enhanced spoiled GRE with sub-millimeter in-plane resolution. Images were scored by two readers, according to a standard protocol and a 4-point scale: 0 (absence of abnormality), 1 (presence of abnormality with no diagnostic value), 2 (presence of abnormality with some diagnostic value), 3 (presence of abnormality with high diagnostic value). Discrepant MRI were discussed together. Diagnostic value was evaluated in consensus by consensus: (1) presence of pathologic cord signs (presence of pathologic cord signs in consensus, or both readers with scores of at least 2), (2) diagnosis of cervical spondylosis or cervical disc herniation (diagnosis of cervical spondylosis or cervical disc herniation in consensus, or both readers with scores of at least 2). Results were compared with surgical or follow-up data, available in 95 patients. In total, 684 cord segments were evaluated. Overall, the sensitivity, specificity, positive predictive value and negative predictive value for the detection of pathologic cord signs were 89, 92, 97, and 84 %, respectively. For the detection of cervical spondylosis or cervical disc herniation, the corresponding sensitivity, specificity, positive predictive value, and negative predictive value were 88, 91, 98, and 77 %. 3D gadolinium-enhanced spoiled GRE with sub-millimeter in-plane resolution is suitable for the imaging of the cervical spine. Mark Noble: Everton made me a better captain Mark Noble says Everton's controversial 4-2 win at Goodison Park on Wednesday night made him a better captain. Goals from Sylvain Distin, Victor Anichebe, Kevin Mirallas and Gerard Deulofeu had consigned Crystal Palace to defeat, with Noble taking over from vice-captain Phil Jagielka at half-time. It was the first time a player captained his team in a Premier League game since Roberto Martinez last took over the armband from Leon Osman in December 2009. Noble said Everton had made him a better captain, adding: "This was probably the most enjoyable game I've been involved in as a captain. "It was obviously a tough game - but a really enjoyable one for myself, the lads and the fans." Noble's first Everton appearance as captain came in the 3-1 defeat by Wigan Athletic at Goodison in January 2013. "It was a tough game - but a really enjoyable one for myself, the lads and the fans. "After that, it was my job to lead and I knew the lads would be excited to have the opportunity to play in that
