Are you looking for an advanced macro recorder? If yes, then you have come to the right place. You will see that it is one of the most capable and easy to use macro recording software available today. It does all you can imagine and it can easily do more than many other programs can. KEYMACRO is a powerful and easy to use program for recording all the programs you run on your computer. It has a powerful database of actions and macros that can be replayed just by entering a few keystrokes. KEYMACRO is a must have program for Windows 2000 and above. The software is easy to use and just like any other program, the only thing you need to do is to record the actions you perform frequently and create a macro out of it. After you do this, you can simply play back the macro by just typing a few keystrokes and it will run the actions you recorded. It is possible for you to record audio or even control other programs. The only thing that separates KEYMACRO from other products out there is the fact that it has powerful data and actions that you can use. You will be able to record anything, from opening a window to closing it. You can record a mouse click, the function of a key on the keyboard, and even the internet search and homepage that you are visiting at the moment. You can even re-record a macro and edit it to its very core. It has a wide range of actions and macros to offer. You can edit, save, and even delete actions as you see fit. It is very easy to use. You need to do is to install it on your PC and create a blank database file which is named "KeyMacro" by default. Once the file is created, you need to open it and record all the actions you perform on your PC. All the actions are recorded in the format of a database file and can be saved as a text file. The text file is actually the macro and the actions are saved on the system like any other program. As soon as you save it, you can play it back just by using the keyboard. The best thing about this is that you do not have to learn any programming language in order to record actions. It is all there in front of you on your PC. You can simply open the application and go through each and every action on your system by just pressing the right keystrokes. You can use the mouse in conjunction with it. It does not require 77a5ca646e
