#### What's New in the OlivaMail?

OlivaMail is an easy to use, and yet complex email client that will enable you to organize your email account any way you want. An interesting feature that this application has is that it allows you to create a SQL query for a better email account management. Protection of cyclosporine-induced nephrotoxicity in rats using bradykinin antagonists. Cyclosporine A (CsA) is an immunosuppressant used in organ transplantation and is known to cause nephrotoxicity. In this study we evaluated the ability of bradykinin antagonists (DX-88, RPR 10984, HOE-140, and SQ-29,548) to protect CsA-induced nephrotoxicity in rats. In the first series of experiments CsA (8 mg/kg per day) or vehicle (5% DMSO/5% PEG400/90% PBS) were administered for 7 days. CsA significantly increased blood urea nitrogen (BUN) and creatinine. Rats treated with vehicle, DX-88, RPR 10984, HOE-140, and SQ-29,548 had a BUN and creatinine level of 1.6 +/- 0.4, 1.7 +/- 0.4, 1.6 +/- 0.4, 2.3 +/- 0.3, and 2.2 +/- 0.4

---

mg/dL and 17.5 +/- 3.3, 17.0 +/- 3.5, 17.0 +/- 3.6, 15.8 +/- 2.3, and 16.4 +/- 2.3 micro mol/L, respectively. In the second series of experiments DX-88 (2 mg/kg per day), RPR 10984 (2 mg/kg per day), and HOE-140 (2 mg/kg per day) were administered for 3 days prior to CsA (8 mg/kg per day) for 7 days. DX-88, RPR 10984, and HOE-140 significantly protected CsA-induced nephrotoxicity. DX-88 and RPR 10984 had a BUN and creatinine level of 1.6 +/- 0.4 and 17.5 +/- 3.3 micro mol/L, respectively, and SQ-29,548 had a BUN and creatinine level of 2.2 +/- 0.4 and 16.4 +/- 2.3 micro mol/L, respectively. The results of this study indicate that the B(2) receptor antagonist RPR 10984 protects CsA-induced nephrotoxicity in rats.

**System Requirements:**

A Note for Mac users: as of version 1.0.1, Anima's emulator does not support Mac operating systems. You can't test Anima itself, but you can try using the GKH.exe tool if you have it installed to convert the GKH.rdf file into the engine's format and run it in Visual Studio. This tool is a visualisation of the engine's internal workings and will let you see if your game will run on the Wii. Development by: Developers: Graphics and Game Engine
