Genial Renamer

This software is a small utility that will help you to rename all files using a genial idea. It will enter in ALL SUBFOLDERS form selected folder and it will rename all files in that subfolders. It will append the current subfolder name to all filenames in that subfolder. Usage: When you will double click the program icon, it will start the magic renaming, it will go to all directories in the current folder and it will rename all files there. You can go to subfolders and change the way it will be renaming the files. It has very powerful feature. You can rename all files in subfolder using folder name and subfolders name. You can use the filters to renaming a directory. For example you can rename all pictures in that subfolder using some date filter. It is a powerful software. Follow us on: Download: More applications here: features of the first isolation of circulating HIV-1 in France, 1991: 2 year follow-up]. The epidemiology of HIV-1 infection is of great interest. In 1991, France became the site of the first isolation of the infection in blood donors. To analyse the seroprevalence of HIV-1 among blood donors as well as the incidence of HIV-1 seroconversion in this population. Analysis of data in blood donors collected between April 1990 and March 1992. For each donor, the number of tests performed and the results of screening were recorded. One hundred and eighty-five (4.0%) of the 4400 blood donors (4.0%) tested for HIV-1 were positive (95% confidence
