**LogbookOCPN Crack + (Updated 2022)**

---

---

---

===== LogbookOCPN Product Key is a small, fast and efficient plugin for OpenCPN that allows you to keep a detailed logbook. This is a useful plugin, because you can save various information from your charts (screen image,

---

ocean depth,...) into text files, but you can do that with the ChartPlotter/Navigator =====

=====

=====

Detailed Description: =====

=====

===== Overview =====

=====

=====

== Charts in OpenCPN are much more than simple drawings to show your positions or your boat's speed. On the contrary, they are much more powerful tools, and have advanced functions that allow you to modify them for a realistic experience of the ocean. Among these functions, you will find the ability to save the image of your charts into a text file, or a CEL/EXE file that you can later read and process. One of the best way to do this is through an utility that is called LogbookOCPN Crack. LogbookOCPN Crack Free Download's

---

functions and characteristics =====

---

---

=====

LogbookOCPN Crack Keygen is a small utility that has the following characteristics and functions:

- \* Save the image of your charts into a text file, or into a CEL/EXE file.
- \* Load images from any CEL/EXE file that was saved in the past.
- \* Change the resolution of the image of your charts.
- \* Create a CEL/EXE file with information from your charts.
- \* Save the coordinates of your chart into a CEL/EXE file.
- \* Disable/enable the screen.
- \* Read and write data in CSV or XML format.
- \* Record stop watches.
- \* Can save and load any type of data.
- \* Can be used with any chart type (ITA, Waypoints,...).

Installation =====

---

---

===== To install LogbookOCPN, first you must install OpenCPN by running the OpenCPN-3.7.0.0-setup.exe file

---

that you downloaded. Then, go to the folder where you placed the LogbookOCPN installer, and run the LogbookOCPN-3.7.0.0-setup.exe file. OpenCPN will show the LogbookOCPN's installation options. Choose the installation option of your choice, and follow the instructions of the installer. When the installation process is finished, press the

#### **LogbookOCPN Crack+ X64**

keymacro.cpn\_ospeed is the OpenCPN speed variable. keymacro.cpn\_imin is the OpenCPN azimuth minimum. keymacro.cpn\_imax is the OpenCPN azimuth maximum.

keymacro.cpn\_prop is the OpenCPN property that you have selected. keymacro.cpn\_malt is the OpenCPN voyage mileage.

keymacro.cpn\_maxt is the OpenCPN voyage mileage maximum. keymacro.cpn\_dtime is the OpenCPN time variable. keymacro.cpn\_dtime2

---

is the OpenCPN time (fraction of a day).  
keymacro.cpn\_decimal is the logbook decimal point character. keymacro.cpn\_dchar is the logbook character for a date entry.

keymacro.cpn\_point is the decimal point character. keymacro.cpn\_cpoint is the logbook character for the crossing point.

keymacro.cpn\_hour is the logbook character for the current time. keymacro.cpn\_hour2 is the logbook character for the current time (fraction of a day). keymacro.cpn\_min is the logbook character for the current time (decimal minutes). keymacro.cpn\_max is the logbook character for the current time (decimal minutes). keymacro.cpn\_stime is the logbook character for the next one day time.

keymacro.cpn\_time is the logbook character for the next one day time (decimal minutes).

keymacro.cpn\_txt is the logbook text.

keymacro.cpn\_zoom is the logbook zoom.

keymacro.cpn\_xaxis is the logbook x axis.

---

keymacro.cpn\_yaxis is the logbook y axis.  
keymacro.cpn\_datetime is the logbook date and time entry. keymacro.cpn\_datetime2 is the logbook date and time entry (fraction of a day).  
keymacro.cpn\_datetime3 is the logbook date and time entry (day of month).  
keymacro.cpn\_datetime4 77a5ca646e

opencpn is a flexible and useful GIS navigation application for various GPS devices. It can be used to plot routes, select places, change charts and view detailed maps (GMap Viewer). The user interface provides clear and intuitive workflows. The application can be used as a frontend for GPS devices. OpenCPN can be used as a MapViewer, a Navigator or as a ChartPlotter. It is easy to use and user-friendly. OpenCPN gives you the possibility to plot routes, select places, change charts, read and save maps, change charts settings, plot charts or export as pdf files. Installation: To install or uninstall opencpn, run the OpenCPN.exe installer and follow the on-screen prompts.

1) Supported GPS receivers:

- Garmin GPSMap 60csx
- Garmin GPSMap 60csx w/ Garmin GPX files
- Garmin StreetPilot G2
- Garmin

## What's New in the?

---

\*\*\*\*\*

\*\*\*\*\* LogbookOCPN creates logbooks for any plane/ship that can be used in OpenCPN. OpenCPN is a free and open source multi-platform program for building and editing charts. It can connect to OSC devices, plot points, etc. and supports C++, Java, Python, Processing, Max/MSP, Javascript, and many more scripting languages. It also contains a built-in flight planner and a built-in map editor. For more info see See also the ChannelLogO.

\*\*\*\*\*

\* Properties: Description \*\*\*\*\*

\*\*\*\*\* Specify which plane, type, and location to logbook (Optional, default is set to Start position/divergent to Limit, see below). Specify the maximum distance from a set position. Minimum and maximum number of kilometers. Custom flight path with the start and end points, the interval

---

between points, and the flight speed. The type of flight to perform: Divergent and/or Parallel. The starting and ending altitude. Custom max altitude to avoid the flight path. Custom min altitude to avoid the flight path. Custom heading. The time interval between consecutive logs. The key strokes to log a new position. The frequency with which to log. Example: \*\*\*\*\*  
\*\*\*\*\*  
\*\*\*\*\*

Start position is set to "heading=255, altitude=0, dist=150", where "dist" is the distance from the start position. A divergent flight is set, in which the distances to the next and previous position are specified. Logbooks are only created if the time interval is not set. Limitations \*\*\*\*\*  
\*\*\*\*\*  
\*\*\*\*\*  
This is a very basic version of the plugin. There are several limitations:

- A logbook cannot be used if the location is outside of the display window.
- The location can only be changed while the logbook is open.
- The logbook is not cleared.
-

---

The maximum number of logs are unknown. It can be changed by the user. - The starting and end position cannot be changed. - There is a GUI timer to change the logbook position. - Custom path types are not supported. Usage \*\*\*  
\*\*\*\*\* File Name: "logbookOCPN.cfg"

---

## **System Requirements:**

**MINIMUM:** - Windows 7 SP1, Windows 8.1, Windows 8, Windows 10, Windows Server 2012 R2, Windows Server 2012 - Internet Explorer 10 - Windows Media Player 10 or higher - 10 GB free hard disk space - 10 GB of RAM - DirectX: 11.1

**RECOMMENDED:** - Internet Explorer 11 - Windows Media
