### ECG Conversion Toolkit

- Based on the Robert Osbourne K-MACRO Design - Uses only 20K RAM - Best fit for: \*Small systems \*Computer memory not equipped with a floppy drive \*Old Diskette system with 10 or 16 bit memory and no floppy drive \*Small systems not equipped with a hard drive \*Computer memory not equipped with a ...more MRV is a statistical method to analyze, evaluate and compare 1D and 2D chromatograms obtained by spectrophotometric and fluorimetric methods. It also calculates retention factor and elution volume for solutes and the shape of the elution profile, or the chromatogram. It uses our unique "Measure" module to provide the required values. Main features of MRV: - statistical analysis of 1D and 2D chromatograms - ability to compare chromatograms obtained by 2 different methods - easy to use and...more Objective: the purpose of the MRVplus software is to help the user in obtaining an objective evaluation of 2D and 1D chromatographic methods, namely for those who don't have the necessary skills in the use of statistical methods. Furthermore, it offers the possibility to make statistical comparisons of data obtained with different chromatographic methods by means of the same statistical analysis tool. Main

features: - statistical analysis of 1D and 2D...more Method development may include the construction of a mathematical model, a set of linear equations which best represent the data collected. This set of equations, along with a table containing the coefficients, is called the method development equation. In MRVplus, the method development equation is calculated automatically. The most common use of the MRVplus calculation package is to compare different spectrophotometric methods. It is possible to compare the...more It is the most powerful software for MRV. Provides a simple menu based interface. It is designed for calculating the relationship between elution volumes and retention factors for solutes in 1D and 2D chromatography. It is designed to be used with any general-purpose personal computer running MS Windows 95/98/NT/2000/XP. In addition to calculating relationships between retention factors and elution volumes, it includes a Pileup module...more The MRVplus software is an automatic method development calculation program. One of its main features is that it compares the results obtained with different chromatographic methods by means of the same statistical analysis

## What's New In ECG Conversion Toolkit?

ECG Conversion Toolkit is an easy to use software toolkit designed to assist you in converting, viewing and printing electrocardiograms. ECG Conversion Toolkit supports: Microsoft Windows platform (Vista/WinXP/Win2000) Microsoft Windows Mobile platform (2003, 2007) Printed pages on standard laser printers Standard 24-bit color bitmaps (RGB) Viewable as both 320x240 screen or 640x480 screen Dynamic creation of standard pages such as Chest X-rays and plain-paper electrocardiograms Sample Data Generator will generate data that is a direct copy of the EKG data that you enter in to the application. The generator can create a total of eight different data files. The Generator will create your own path name and file name that will be in the format:

\_ECG\_SampleData\_[Year]\_[Month]\_[Date]\_[Hours]\_[Minutes]\_[Seconds]\_[EventSourceNumber]\_[EventId]. It is important that you copy each and every Data Source and Description and File name exactly as it appears on the following pages. ECG Conversion Toolkit Supported Data Source: Generic Biphasic Monophasic Quadruphasic Asystole Bradycardia Pseudonormal Tachycardia Polyphasic Periodic Pulsatile Spontaneous Three Waveform Waveform Plots Graph Plot Date, Time, and Channel Map Simple Waveform Heart Rate Systolic and Diastolic Blood Pressure NOTE: When saving the new data you must specify a path and filename, these must match the path and filename that was used to generate the original data. ECG Conversion Toolkit Supported File Formats: Allowed Only when using the generic data source. Allowed when using any data source. \_ECG\_GenericDataFile\_.txt \_ECG\_SampleDataFile\_ ECG Conversion Toolkit Supported Output Formats: Allowed for Printable Data File(s) Allowed for the generic data file Specify the path and filename, these must match the path and filename used to generate the original data. \_ECG\_PrintableDataFile\_.txt \_ECG\_PrintableDataFile\_ ECG Conversion Toolkit Supported Output Formats: Allowed for MicroSoft Visio/Draw V2007, Visio 2013 Create a new text box.
