You will also have the possibility to choose the plots and traces you prefer. It uses plugins to extend its functionality. Current plugins are mostly for the Holley Commander 950. EFIViewer Description: ETUI stands for Electronic Tachymeter Information and is a diagnostic tool for the Holley Commander 950 carburetor tachometer. It displays all relevant information about the Commander 950 carburetor tachometer, including engine RPM, fuel amount and carburetor heat. This diagnostic software allows you to save the engine RPM at specific times, and recall them later. You can also display the last 10 seconds of engine RPM data in a graph with a specific frequency. By moving the frequency scale up or down, you can choose which kind of frequency you want to look at. The graphs will be stored in a history file, so you can easily access the graph later. Using ETUI, you can convert the graphs to text files and print them, so you can easily export data to the EFIgy software. ETUI has a one-time free evaluation version, so you can try this software, before purchasing the full version. ETUI Description: Flat panel display with multi-temperature support Standalone, compatible with factory diagnostics CE, UL, UL/CSA approvals \$599.00 ETUI Demo ETUI ETUI stands for Electronic Tachymeter Information and is a diagnostic tool for the Holley Commander 950 carburetor tachometer.
