'SpyBlocker' will run on ANY version of Windows, XP, Vista, Windows 7, 8 or 8.1. There are NO dependancies, NO third party tools, and NO registry entries to install. 'SpyBlocker' will run from either a USB key or CD and will work with ANY web browser. 'SpyBlocker' will remove the Internet's unsafe resources and replace them with a tiny graphic that's 'clickable' to identify and report the ad/tracking/spyware. SpyBlocker's tiny graphic will not interfere in any way with your internet experience. Example: SpyBlocker will remove Internet resources and replace them with a graphic image that's clickable and reportable. All spyware/adware/tracking advertisements will be blocked and unclickable, in addition to browser specific spyware that are blocked. Advertising Trackers are identified as such by the'src' tags of tracking elements, which is a critical element in the program that allows a person to log their successes in catching and reporting cyber criminals who are trying to illegally track your online activities. By defeating these'src' tags SpyBlocker will stop all Internet tracking, such as tracking cookies and website Java Scripts. All online tracking and 'click the ads' to get more will be eliminated. SpyBlocker is a productivity tool to stop cyber criminals from tracking you and your online activities. SpyBlocker is NOT a Anti-Virus product. SpyBlocker is for the security conscious user.
