Office Space Sticky For PC

[Download]

Office Space Sticky Crack+

Add Office Space Sticky to your Yahoo! account and use Office Space Sticky to create desktop sticky reminders on your Windows desktop. Sticky adds Office Space references to your Yahoo! account, so you can quickly find office supplies in your locker, restaurant or ATM. Office Space Sticky also integrates with the Windows desktop, so you can quickly find Office Space supplies on your desk, at your computer, in your car, in your hotel room, or in your pocket. Office Space Sticky has a 2D display and has the following features: * Applying Office Space Sticky helps you remember the reference the next time you're in the office. * Office Space Sticky displays a reminder of what you need to remember each time you login to your account. * Sticky shares a snapshot of your desktop with others in the Office Space Sticky network. * Office Space Sticky's user interface is easy to use. * Office Space Sticky works with Web 5.0. You can also use Office Space Sticky to keep reminders for your favorite friends and family. Office Space Sticky uses the Yahoo! Widget Engine for graphics, which requires a fast connection to the Internet. * Office Space Sticky is brought to you by Yahoo! This product is ad supported. Usefull when you want to see how much your system is using while it's idle. Supports to be embedded in frames or not, enable or disable the CPU widget and customize the CPU

What's New in the Office Space Sticky?

Office Space Sticky Note Widget can be pinned anywhere on your desktop, and displays a nicely-designed reminder that resembles the sticky notes on a message board. 1.0 Fri Mar 28 23:04:53 PDT 2013 v0.9 Sat May 27 01:27:42 PDT 2011 Improved the spacing of the tabs between the reminders. Added support for the latest Yahoo! Widgets v0.8 Fri Oct 22 00:25:57 PDT 2011 A long time ago. I had a goal for the widget: to be ultra-light-weight. The original python script was 80k or something like that and it worked fine. Then, I decided to refactor it to make it more efficient. So it shrunk down to 10k, but ran much slower than the original. I didn't have the patience to fix it, so I retired it to the background. v0.7 Fri Mar 30 18:51:47 PDT 2010 Fixed a bug where the most recently viewed time of a widget would not be remembered v0.6 Fri Oct 21 21:50:48 PDT 2009 Changed the placement of the reminders to make the top-left corner a little better. It makes them easier to find when you only have a few v0.5 Thu Oct 7 22:13:28 PDT 2009 This is probably going to be the last release. I've been having some troubles with my hosting company, and after a bunch of requests and hounding, they're finally upgrading me. Hopefully it's an upgrade from a 2-shared server to a 10-shared one, which should bring back stability. v0.4 Sat Jul 30 16:48:34 PDT 2009 v0.3 Fri May 22 22:31:45 PDT 2009 This new version adds support for yahoo! widgets. v0.2 Fri May 22 17:28:04 PDT 2009 The first public release v0.1 Fri May 22 02:46:46 PDT 2009 v0.5.1 Tue May 26 00:28:55 PDT 2009 LOTS of improvements. - It now supports a dynamically created interface! - Now supports both new and old interfaces - It's much easier to configure (config file) - The background screen now rotates when the interface does (the previous version didn't) - The reminders now support dynamic color schemes - Reminders can now be hidden from the interface (if you want that) - Resizes pretty well - Improved overall appearance - Widget previewing - Viewing of the notes is now a context menu option (right click on the widget) - Auto updates to Google Earth -
