FreeWrap Latest

createWrap is a tool that allows for the creation of TCL/TK scripts, which could then be used as programs for multiple operating systems. It can convert scripts into such different binaries as it is not dependent on TCL/TK applications. It is supported under the GNU General Public License v3.0. In addition, it can be used as a standalone WISH interpreter or as a standalone single-file WISH interpreter. Features: createWrap is a tool that can be used to convert TCL/TK scripts into single-file binary executable applications. It can convert scripts into such different binaries as it is not dependent on TCL/TK applications. #include /* createWrap is a tool that can be used to convert TCL/TK scripts into single-file binary executable applications. It can convert scripts into such different bundles as it is not dependent on TCL/TK applications. If you want to be able to run it on multiple OSes, you will need to have it installed on the machine that you run it on, it will not work on another machine. Usage: createWrap [-w] [-d] [-f] Arguments: - Script you want to wrap. It must be a TCL or TK script. Options: -d - Generate debug information. If you don't provide this argument, the program will automatically select whether or not to include the debugging information. -f - An old flag that enables an old kind of compression used by GNU tar. -h - Print the usage of the command and exit. -l - Turns on a detailed listing of the files that were used to create the wrapped script. -w - Indicates that you want to use a single-file WISH interpreter, which will be created as specified. -v

What's New In FreeWrap?

See FreeWrap Installer (only Windows) FreeWrap Installer is an application that will help you install FreeWrap on any Windows machine. It can install and uninstall either the FreeWrap Python package and the FreeWrap command line tools. It also includes a script that will check for the latest version of FreeWrap and download it automatically from SourceForge. Additionally, it can be used to install the FreeWrap Python package, the FreeWrap command line tools and any of its dependencies. The app can be executed either through its own script or through double-clicking the installer.
