FIFA is the world’s leading sports franchise, the sports game that’s played by fans all over the world. FIFA brings gamers closer to their favourite teams, players and leagues than ever before with accurate team and player movements, realistic ball physics, individually-authentic ball control and match-day atmosphere. What is EA SPORTS? EA SPORTS is the leader in sports video games and is renowned for creating the definitive games of sports and sports entertainment. Its cutting-edge game technology is unique in the industry and has won nearly every award there is to win. What is the FIFA series? The FIFA series represents a sports simulation genre where players can virtually experience all the play elements of the sport. Players can take on the role of their favourite teams, players or league, and interact with every aspect of their game. What can you do in FIFA? Be part of the action through interactive, authentic and creative gameplay. Relive or create a new story through the day-to-day life of teams and players around the world. The player’s skill, tactics and teamwork are the keys to victory. The FA Cup is the oldest knockout competition in world football. It was first played in the 1872-73 season and finished that year after Manchester United swept to their first FA Cup, beating Oxford University 3-0 at The Oval. Earlier this year I provided an initial look into how the new things we are doing with the ball can improve player awareness in more ways than just the ability to see through walls. Well, we hear the same thing from people (and often the same people) who have played our games before. So I’ll never say I have nailed it, but maybe I can shed a little light on some of the new things we are trying to do with player awareness. The one thing I will say is that this year’s gameplay elements are the best yet. We have been listening to feedback and running a ton of new tests and bc9d6d6daa
