Validate tickets - a powerful report tool that can display, email or text data. Call back and alert users of the current activity. Quantity Surveyor Surveyor The quantity surveyor sells construction projects to developers and land. Type Of Inspection UnitA .Q: How to get the latest value of R cube in RNN? I am trying to get the latest value of R cube in RNN. Lets say I have 5 observations of RMSE, and I want to get the latest R cube for them. I did try train() but get an error. So I used predict() but it still failed. Any idea? library(broom) library(dplyr) library(RNN) data(pacman) pacman %>% select(average_price) %>% rownames_to_column(var="row") %>% rowwise() %>% mutate(row = rowname()) %>% mutate(R = as.numeric(row), RMSE=as.numeric(pacman\$average_price)) %>% mutate(R = lag(R, default=FALSE), RMSE=lag(RMSE, default=FALSE)) %>% bind_rows(data.frame(row, RMSE, R)) row RMSE R 1 pacman_2015 864932 2 pacman_2016 838911 3 pacman_2017 857453 4 pacman_2018 847053 5 pacman_2019 851371 RMSE=c(864932, 838911, 857453, 847053, 851371) R=c(NA, NA, NA, NA, NA) Above I get the sequence of RMSE and R cube for each row in pacman. row RMSE R pacman_2015 864932 NA pacman_2016 838911 NA pacman_2017 857453 NA
