It also took less time than the other 3 designs of wind roses I`ve downloaded. It shows the wind direction and speed. Thanks" Superwind 4/7/2007 1:03 PM "Without a doubt, this is the best windrose available for free in the market. I use it on a regular basis and with the new version, I had no trouble at all. Great job. Regards" Anonymous 3/7/2007 9:42 AM "This is my first time using windrose for creating a windrose and I think that the program is easy to use. I am a beginner and still learning things on how to create a windrose, which is very easy to use. The menus are well laid out and make me click on the menu items in the right order. I like the ability to customize the chart and make a more professional windrose." windrose program problem solved 5/12/2011 1:36 AM "I created a script so that I can programmatically output a wind rose programmatically to a.csv file for

I know that I can mock an object by using Mockito, but isn't it possible to use both Mockito and @Mock? A: Short answer: no. Long answer: Mockito is an implementation of the idea of a mock, that is, it provides an easy way to capture interactions with objects and verify that certain interactions were in fact performed. Mockito does not provide a way to, well, mock the class itself - that is, you can't have a Mockito class and have it mock some class that it is extending, for example. You could create your own mock class that extends that class and adds the @Mock annotations to your own mock classes, but you then risk breaking the class you're mocking if there is an expectation (say, that method returns a null) that only relates to the class you're mocking. If you are using Mockito, you should probably just use it, rather than creating a separate mock class. WindRose PRO Activator

Introducing WindRose PRO (formerly known as WindRose) - the new and updated version of our free wind rose software WindRose. WindRose PRO is a wind rose software to calculate and draw wind rose, wind rose chart, wind rose, wind direction line, wind speed line, wind rose line graph, wind speed and direction rose plot from wind speed data, wind speed and direction data, wind speed and direction readings, wind speed (meters per second) and direction (degrees in 15 minute intervals), wind gust speed and direction readings, wind gust speed (meters per second) and direction (degrees in 15 minute intervals), wind speed and direction readings, wind speed (meters per second) and direction (degrees in 5 minute intervals), wind speed (meters per second) and direction (degrees in 2 minute intervals). WindRose PRO supports input data from Excel, EnergyPlus Weather files, ISC3ST/NMEA0183/NMEA0083/GPS0183/NCEP0183/GFS0183/NOAA surface meteorological files and file formats: ASCII fields, X-axis, Y-axis, Z-axis, -axis angle, -axis angle, -axis angle, -axis angle (radians). Windrose PRO supports raw data (degrees) as well as ASCII format wind data (degrees). Windrose PRO supports 2D or 3D wind roses. You can plot raw data, ray, minimum, maximum, average or date and time. You can plot the evolution of a variable from a date and time. Windrose PRO supports wind turbine location. You can calculate crosswind and tailwind formulas. Windrose PRO can save the output as BMP, JPG, PNG, DXF, SHP, KML and more. Windrose PRO saves the rose in BMP, JPG, PNG, DXF, SHP, KML formats, you can save only the rose or all charts. Charts can be configured by adding titles, logos, legends and notes to the chart and can be filtered by value or the date and time. Windrose PRO can compute the wind speed and direction in the following time intervals: 15 minutes, 5 minutes, 2 minutes, maximum value from the

What's New In WindRose PRO?

* Automatic wind rose generation * Import multiple files * Analysis of multiple datasets * Crosswind and tailwind calculation * Polar charts for any data (minimum, maximum, average, minimum and maximum) * Customize charts by adding legends, title, logos and notes * Randomize data for a full randomization of the wind rose * Create simple or sophisticated wind roses * Generate valid and invalid data * Export to Excel or Google Earth (in KML format) * Import data from more than 25 raw datasets, including NMEA0183, ISC3ST, ISK3ST, ISCT3, ERA, Excel and text files * Plan windrose output using the CATIA CAM system and other popular CAD systems (CATIA V5, AutoCAD, MasterCAD, PlantCAD, SolidWorks) Zengaru Plus Remote Control System Zengaru plus is a software for remote control of the Zengaru Plus Zrv with AOSA the master and a second AOSA or Zrv or Zr controller in your hand or on the ground. Zengaru Plus features: * Full compatibility with Zrv Plus * New able to use a second Zrv for pan and tilt * Implement the "multi-user" mode * Full mapping function * Multiple versions management * The creation of a memory * The creation of simple xyz positions * The creation of absolute positions * Sound * Multiple configurations for AOSA devices (single AOSA or of many) * Supports multiple AOSA devices * Multilingual * Works with Zrv Controller with USB or serial interfaces * Works with Laptop and USB or serial key board * Modular code. Just expand the app to use all functions. * Separated for testing * Extends the range of the app from 300m to 2km * Programs can be loaded from SD card without an intermediate USB key * Allows the addition of new functions. * Allows the fitting of a new sound * Allows the fitment of hardware (expansion slot) * Allows the fitment of hardware (expansion slot) EnerGUI PRO 3.40, EnerGUI plus 3.40, SimPowerPro 8.3.22 EnerGUI is a software for monitoring power in electric utilities.
