Adjusting brightness and contrast One of the most basic editing tools in Photoshop is a light- or dark-room-type tool called the Curves. Curves lets you adjust the overall brightness and contrast of your image — lightening or darkening an image — and even create color adjustments. To use

Curves, open up your image in the Editor window (as I describe in Chapter 12) and then select the Tools panel's Adjustments menu to open the Curves palette (refer to Figure 13-2). As shown in Figure 13-3, you can create a custom curve, copy curves from another image, or use curves preset to create a new curve based on

what's already in your image. FIGURE 13-3: Use the Curves palette to adjust image brightness and contrast. To adjust brightness and contrast, first select a point on the graph. In Figure 13-3, I use Point #1 to select that area of the graph. Then move the cursor to the right or left to select where you want to change the brightness or

contrast (the changes occur in the image window that opens). Click the OK button to apply the changes. If you don't like what you see, just click the Reset button to remove the changes.

also has a total of 168 Americans that are confirmed to have been killed by the Chinese government. The U.S. Departments of State and Commerce also lists the recent events in China, among them, the forced “re-education-through-labor camps, suppression of basic freedoms, and its

military's tactics, engagements, and equipment." However, despite all of the evidence that it has against the Communist Party of China, and the complete suppression of its people by the People's Republic of China, the U.S. is in the process of striking up a trade deal with the Chinese government. The Untold Story of China's

Role in the Coronavirus
The government of the People's Republic of China did attempt to introduce the coronavirus to the world, in an effort to cripple the economy of the United States, and could possibly rekindle some early Cold War hostilities. It has been reported that the Chinese government knew that the virus could be brought

to the United States, and is responsible for disguising the coronavirus as something else in an effort to escape blame. The virus has reportedly infected tens of thousands of people across China's southern province of Hubei, and many of those infected died, according to reports. China's Communist Party tried to hide the problem

by preventing outside journalists from going to the province to cover the problem. At a time when the country is under severe economic difficulties, the world has seen the deaths of tens of thousands of Chinese citizens. Now, the United States has been subjected to a Chinese virus, in a move by the Chinese government, that has

paralyzed the U.S. economy. The Chinese government could learn a lesson from this experience, and it should pursue a similar path in the future. I'm going to step in and give it to you straight guys... Tom Cruise is in an abusive relationship. Cruise couldn't deal with being the least bit objectified anymore, so he took the

only route he knows to deal with his turmoil - yanking away a few of the woman's more basic human rights until she acts like he wants her to act. Just like Kevin Costner in Dances With Wolves, Cruise starts to control the situation and take charge. He can't beat another man, so instead he makes sure women don't use the

bathroom without a man present. And if that doesn't work,
