I just bought fifa 14 and have some issues with it, some say the game takes a long time to boot and many of the players animations are not like FIFA 17 and the other comments the AI is really annoying you are getting marked behind the ball while the player is ahead even if they do not have the ball or they fall over that player is marked. why FIFA 17 is not getting any more AA points in PES, 18 is coming up soon so PES better get the AAA soon because PES is going to be driving us FIFA soon, lets hope PES put more time on graphics. I just bought Fifa 17 and are having a really difficult time figuring out how to beat the AI, the defenders are always guessing and they are way to fast sometimes i see the ball coming to me but i cant dribble and i cant pass the defenders to create the space, sometimes i get pushed out of the box and the defenders kick me because im not in the box. I dont know how to turn on the ball control or something else but i dont want to start over. GOOGLE + FIFA 17 + COMPUTER = FAIL I have installed FIFA 17 on a laptop and this game is incredibly slow. I have started over, making sure that my computer is up to date and everything else

For the first time ever, players can directly engage with and own a piece of the sport they love, thanks to a new ownership model built for the digital age. The year is 2022, and the future of FIFA has arrived. Our Story The road to FIFA 2022 starts now. To build the new FIFA, EA Sports first turned to its biggest fan base: the millions of soccer players around the world. Revolution in Play When it comes to play, FIFA players are passionate, engaged and tactical. To get closer to the live experience of the game, we have spent a lot of time and energy improving gameplay across every single mode. Showcasing Momentum and Control The core of the gameplay engine has been completely reworked and the momentum and control behind players' movements is improved, meaning you move more fluently and possess the ball quicker. We have also completely redone our handling model which moves with players and accelerates the ball realistically. A Revolution in Defensive Play The new defensive AI has been completely reworked. No longer will players get caught out of position or chase the ball all over the pitch, meaning players can take on defenders more confidently. Our new collision system also makes plays much more realistic, improving the feeling of the pressure during tackles. A Revolution in Free-Kicks Opposing players can now take advantage of your poor positioning during free-kicks. In addition, the new handling model means that players benefit from the trajectory of the ball better. Plus, they can actually control the ball when it goes out of bounds. New Attack Mode To add more tactical intelligence, attacking options are now heavily influenced by the time remaining and the opposition's positioning. Brand New Training Mode Players can now train with over 22,000 hours of user-created content (made using the new Players Studio) as well as their favourite Clubs, Players and Moments. A new career mode lets players build their own dream side, and
