I have just made a donation here: [It covers the last to get the full version of dune.](#) I have not got the money to buy a Mac to keep my mp3s and burning my own CD's. As such I am closing the site and I am moving to a paid-for service. The site was once going to be done on a monthly basis but I just do not have the time anymore. I am getting older and I am working long hours on my painting, and after I finished I have no time for the site at all. I am glad all of you enjoyed the site for so long but I do not want to go on any further. I wish you all well in your artistic endeavours. I have been given a few days to export my files before I shut the site down. I could do the export within the site but I would need to start a new user name etc. before I could export the MP3s

## KURLO Crack + Free License Key

Kurlo is a contact manager that aims to make the task of keeping contact information organized as simple as possible. It supports both personal and corporate information such as contacts, organizations, addresses, email addresses and even birthdays and anniversaries. You can add information to the Kurlo database easily with the standard Windows "File | New | Contact" feature. You can also export your data in a wide variety of formats such as HTML, CSV or MySQL.

**Individual Contacts:** Kurlo lets each user maintain his/her own list of contacts. Your name, address, email, voice mail, IM/AIM and birthdays and anniversaries are all separate and can be stored in separate lists, address books and folders.

**Organization Contacts:** Kurlo allows for group contact information such as your company's contact list. Individuals can be added to the organization contact list so that the company's email addresses and voice mail are associated with that individual.

**Address Lists:** You can create many different types of address lists, such as work, home, vacation, cellphone, office, fax, etc. Contacts that belong to the same address list can be moved and changed in various ways. The information in address lists is exported in a wide variety of formats such as HTML, CSV and MySQL.

**Email Lists:** Because Kurlo uses an address book data structure, all of your email addresses are stored in a list. You can add as many email addresses as you like to your address book by simply double clicking on the list.

**Address Labels and Envelope Printing:** Kurlo can also be used as a contact manager that allows you to print contact information on your label sheets. You can create contact information in any format you like such as a label or a business card. Address label printing is supported in both standard and custom size address labels. Email can also be printed on the labels, allowing you to print a new message on a new label sheet. Standard address labels are provided as well as custom labels for whatever you may need.

**Import/Export:** Kurlo can import/export contacts via the Windows "File | New | Contact" feature and the "File | Import | Contact" feature.

**Data backup:** Kurlo can export data in a wide variety of formats such as HTML, CSV and MySQL, providing complete backup capability. Kurlo also allows for data recovery in case of a hard drive crash.

**Customization:**

## What's New in the?

"KURLO" (pronounced Kur-lee) is a free and portable contact manager. KURLO is a Windows-based contact manager and organizer, it's portable and uses an easy-to-use interface to update your contacts, organized in a variety of ways. It can read and organize contacts in your Microsoft Outlook and GEM desktop and webmail or web mail portal (Yahoo, Hotmail, Gmail, AOL etc.) accounts. KURLO allows you to maintain multiple users, one for each, with each user having their own separate set of data (contacts, address lists, email lists, etc.), and you can have as many user accounts as you want, for as many users as you need. Not only can you organize your contacts by name, but you can also organize them by:  Location  Family and Friends  Jobs  Education  Trades  and more! KURLO will even allow you to set up a special custom event, you just select when you want to create the event (eg., birthdays, anniversaries, etc.) and you can mark the different ways the event will be displayed, how you want it categorized, how many days or weeks in advance you want an event to be marked, how you want it categorized, or how it's categorized, and the amount of information you want to include about each of your contacts, either in person, email, phone, fax, text message, and message status. When you use KURLO you can mark your own special life events on your calendar. You can add individual contact information (phone and fax number, email address, mailing address, etc.) and have the contact auto-add to you phone contacts, address book, email contacts or address book, and email contacts. You can also have as many email contacts as you want for each contact. You can also create a separate Address List for each contact, which is great for people with many contacts and addresses. You can also easily import CSV files and you can import from your Outlook Contacts, Outlook Address Book, Hotmail Contacts and your ISP's address book, plus any other contact managers you use. KURLO also allows you to export your contacts to Excel format, CSV

---

format, or to your own personal address book. KURLO is really easy to use, it's very intuitive, you can create and add contacts

---
