By Glynn Wilson BBC News Thousands of travellers are moving to North America after moving to Britain in the recession A phenomenon has been described as "The Great British Exodus", where people are moving to Canada in huge numbers to escape the economic slump in the UK. Publicly, Canada has a reputation for being an uncaring place, a cold and stark country with the prices of petrol and groceries often way out of step with European ones. But a new book, *The Great British Exodus* (The Economist Bookshop), highlights how the Canadian side of the border has been experiencing a surge in economic growth and a rise in sophistication and diversity in recent years. Stephen Huggett, author of the book, has made nine trips to Canada, and he has plenty of support from people he has met there, including French-Canadian and English-Canadian businesses. They say Canada has moved to the head of the queue in global economic recovery, and that its recovery is in many ways better than Britain's. Many businesses are, for example, based in Canada because they can take their profits from there and their customers back to Britain to spend. The author said: "I've spoken to quite a lot of people, businesses who have been operating in Canada for a long time and told me that all of a sudden there's a demand, because people are coming over here and being British again." Repercussions Canada is looking to Europe, rather than to the US and Asia, for its opportunities, and it is to this end that the government has invested in cultural promotion. Libraries have long been one of the ways that this can be done and, indeed, the Commonwealth Library Network has offices in Canada and New Zealand. The author said the Commonwealth's "soft power" was one of the things that he found most appealing about Canada, and he said that one British institution that the Canadians had found as a reference library was the Chartered Institute of Library and Information Professionals. "We don't have much of a reputation, but they tell me that our research resources are the best they have in the world," said Mr Huggett. "There are also some fantastic research centres, in the National Archives, as well as one or two extremely good anthropology centres, and I don't say that as an insult to the British Museum in London, because it's an amazing place. "But one of the things I particularly enjoyed was the national war memorial, which we forget about in Britain because it's a different kind of war. "The Canadian

gopro bg400 3 The range of available models within the GoPro range has expanded, now featuring 1080p, Full HD and 4K formats, along with a variety of frame sizes, sensor sizes and lens types. There are now also some models with built-in electronic viewfinders. Below we have added an updated listing of all current models – click on the name of the model for details. The B1 is a first GoPro camera offering a simple design but with an impressive range of features. The camera can record full HD footage at up to a whopping 60fps and the lens has a 27mm f3.5-5.6 lens with a 1" CMOS sensor. Additionally, the B1 also has a Micro SD card reader and a 3.5mm jack. It also has Wi-Fi capability, which allows you to connect the camera to a device using a USB cable and share the footage via a wireless connection. The battery life is good and the camera is IP67 rated. The B1 can be used for just about anything, from capturing indoor ski slopes and snowboarding events to capturing wildlife and scenery and the like. It is ideal for action photography and swimming and other activities. You can also take action shots with the B1, whether it's a sky dive, skydive, bungee jump, car chase, race track, hang gliding and more. The B1 is a very compact device that is waterproof up to 40m. It comes with two batteries. One is a rechargeable LiPo, and the other is a disposable set of batteries that can only last a short period of time. But if you need to run a long flight, you have to be limited to the disposable batteries. Once those are used, you have to buy a new set of batteries. This limits the usage of the camera. However, you can use the included charger to charge batteries. The USB charging cable is long enough to attach to the charger. But before you charge the batteries, you have to remove the batteries and turn off the camera. What to look out for: Unfortunately, the B1 has a lot of downsides. First, it is the cheapest GoPro camera available. Second, it does not have a live view feature. Therefore, you cannot see the footage you are recording. Third, the image quality is not the best. If you are very short on funds, then the B1
