Quiero crear un programa que lea varios datos de un fichero y convierta a cadena estos datos.

Como esta cadena se almacenara en una variable? Es decir, cada uno de los datos leen a la variable s1 y la almacenara en una cadena de tipo string. Cuando ejecuto el codigo se lanza la siguiente excepci3n:

```
Exception in thread "main" java.lang.String
IndexOutOfBoundsException: String index
out of range: 0 public static void
main(String[] args) { // TODO code
application logic here Scanner sc = new
Scanner(System.in);
System.out.println("Inserte la cantidad de
filas"); int fila = sc.nextInt();
System.out.println("Inserte el tama1o de
cada una de las filas"); int tama1o =
sc.nextInt(); //Scanner sc = new
Scanner(System.in); /* * String s1 =
sc.next();
