Q: Should our expression be kept as is? We have this question on a test, and I think we should keep it as is. Imagine what would happen if all of the servers a client has online would go offline at the same time, causing the client to be disconnected from the Internet. A: This question appeared during the short period of time between when the first vote was cast for the question, and when the question was closed, so it wasn't asked/answered with the current Community Guideline on test questions, which states: Your test should be a realistic portrayal of the kind of problem that you might face on a daily basis, and should be as non-academic as possible.
