Image courtesy of Robert Nyffeler * * * **Case Study:** A Troubling Issue Robert Nyffeler, the owner of the image on the previous page, runs a professional photography business, is also an extremely talented and ambitious photographer, and has been using Photoshop for many years. This image was created for a client who required a certain look and feel, but wasn't looking for anything produced to a high level of quality. The client didn't share any details about his project until well into the editing process. As a result, Robert was totally on his own when creating this image and wasn't sure what to expect. Robert expressed concern about how the image would look to his client and how he'd be reprimanded if he botched this photo. The client, on the other hand, seemed very pleased with his work, with the exception of one small problem: the section of the woman's face that was originally a fuzzy blur is all that is visible on the image. The client had asked to have that area blurred out, and so the image was trashed. When Robert went to complain about this to the client, the client told him not to worry, that he was far more concerned about how the picture looked than what was visible in the image. This client wanted to get the image done, and, in the eyes of this client, Robert failed. So, what happened here? When creating this client-driven project, Robert tried to work within a certain set of parameters and was limited in his choices. * * * ## Professional Graphics Software Adobe Photoshop is the industry standard. RICHMOND, Va. (AP) -- Virginia officials say a driver has hit a police cruiser in Alexandria, injuring four officers. Police say the driver struck the officers' cruisers around 3:30 p.m. Sunday in the parking lot at Lake Fairfax Park. They say the driver didn't stop after hitting the cruisers and continued driving. The officers' injuries aren't considered life-threatening. One officer was taken to the hospital for evaluation, and three others were checked at the scene by a hospital ambulance. All are police officers, the department says. Local media outlets report that alcohol is suspected as the cause of the crash. Police did not immediately confirm that but say all drivers involved were under the influence. The crash happened in a busy area of Alexandria with businesses and schools nearby.

Starring Tom Cruise as Head of Global Operations "Jack Reacher" (Cruise) when head of security (Cameron Britton) in the United States undergoes some "renaissance." In a place as vast as America, Reacher's no-nonsense attitude makes him a strong opponent of the local criminals and corrupt police forces. As he deals with being one of the most wanted men in the world, he also develops a relationship with a woman (Rosamund Pike) investigating a series of crime scenes and death

Q: How to add values to a List from another List? I have two List and I have to add the values from List one to another List. Here is the sample code:-

```
class Class1 { private List myList1 = new List(); public List MyList2 { get; set; } public void AddList() { for (int i = 1; i < myList2.Count; i++) myList2.Add(myList1[i]); } public void AddList(Class1 class1) { for (int i = 1; i < class1.MyList2.Count; i++) myList2.Add(class1.MyList2[i]); } }
```

So the instance is being created to the default, no-parameter constructor - that's why you can assign to the property MyList2 and the assignment is not blowing up. If you change it to a new()- instead of a new not-named-with-parameters constructor, the program will throw. Note that if you made MyList2 a readonly property instead of an auto-property, the compiler would have flagged the assignment here as well (and you would have not gotten it working).
