I am using the following code to call the endpoint: var request = (HttpRequest)WebRequest.Create(apiEndpoint); request.Method = Method.POST; request.ContentType = "application/x-www-form-urlencoded"; request.ContentLength = data.Length; string content; using (var requestStream = await request.GetRequestStreamAsync()) { await streamWriter.WriteAsync(data); } var response = (HttpWebResponse)request.GetResponse(); var reader = new StreamReader(response.GetResponseStream()); content = reader.ReadToEnd(); return content; The issue I am having is that I am not getting a content-type header in the response. However, when I call the endpoint using WebClient.UploadString(), I do get the right content-type header. Is there a way I can get the correct content-type header in the response? A: I think this is related to the change that WebClient introduced on January 7th. See The relevant information from the blog post is: Windows 8+: If a response is received with status code 200, then the content-type
