Electric skateboards are the ultimate transportation tool for adrenaline junkies and commuters alike. Their efficiency and eco-friendliness make them stand out from traditional skateboards, and their unique features make them a must-have for all skateboarding enthusiasts. In this article, we are going to look at the best electric skateboards of 2021 and what makes each of them stand out.

The Boosted Stealth

The Boosted Stealth is a high-end electric skateboard that delivers top-notch performance. It has a top speed of 24mph and can cover a distance of up to 14 miles on a single charge, making it one of the longest-range electric skateboards available. One of its unique features is the deep dish composite deck that offers a stable ride even on uneven terrains. It also has regenerative braking that recharges the battery while braking, making it an efficient and eco-friendly option for riders.

The Evertion Raptor 2

The Evertion Raptor 2 is a beast of an electric skateboard that delivers unmatched power and speed. It has a top speed of 30mph and can cover a distance of up to 25 miles on a single charge, making it perfect for long-range rides. Its dual hub motors deliver a whopping 3000 watts of power, making it one of the most powerful electric skateboards available. Its deck is made of carbon fiber, making it lightweight and strong, and it also features a unique swappable battery system that allows you to extend your ride time by swapping out batteries on the go.

The Evolve Bamboo GTR

The Evolve Bamboo GTR is a sleek electric skateboard that delivers a smooth and comfortable ride. It has a top speed of 26mph and can cover a distance of up to 31 miles on a single charge, making it perfect for long commutes. Its deck is made of bamboo and fiberglass, making it lightweight, flexible, and durable. It also has all-terrain wheels that can handle any terrain, making it perfect for riders who like to explore off-road.

The Meepo NLS Pro

The Meepo NLS Pro is an affordable electric skateboard that delivers impressive performance. It has a top speed of 29mph and can cover a distance of up to 18 miles on a single charge, making it perfect for short commutes. Its deck is made of bamboo and fiberglass, making it lightweight and flexible, and it also has dual

hub motors that deliver a total of 1200 watts of power. Its unique feature is the regenerative braking system that recharges the battery while braking, making it an efficient and eco-friendly option for riders.

The WowGo 3

The WowGo 3 is a budget-friendly electric skateboard that delivers excellent performance. It has a top speed of 24mph and can cover a distance of up to 14 miles on a single charge, making it perfect for short commutes. Its deck is made of bamboo and fiberglass, making it lightweight and flexible, and it also has a hub motor that delivers a total of 700 watts of power. Its unique feature is the regenerative braking system that recharges the battery while braking, making it an efficient and eco-friendly option for riders.

In conclusion, the year 2021 has seen a lot of impressive electric skateboards hit the market. From high-end to budget-friendly options, each of these electric skateboards offers unique features and impressive performance. So whether you are a seasoned skateboarder or a commuter looking for an eco-friendly mode of transport, there is an electric skateboard out there for you.
